EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael L. Gellner on 3/26/2009.

The application has been amended as follows:

Claims 20-22 are cancelled.

Independent claim 1, line 11 has been amended to read "...approximate a three-dimensional shape of the geometrical shape model, wherein the width of each microfacet is calculated as equal to, or greater than, the square root of three times the width of each corresponding voxel;"

Independent claim 8, lines 8-9 have been amended to read "...approximate a three-dimensional shape of the geometrical shape model, wherein the width of each microfacet is calculated as equal to, or greater than, the square root of three times the width of each corresponding voxel;"

Independent claim 14, lines 11-12 have been amended to read "...approximate a three-dimensional shape of the geometrical shape model, wherein the width of each microfacet is calculated as equal to, or greater than, the square root of three times the width of each corresponding voxel;"

Art Unit: 2628

The following is an examiner's statement of reasons for allowance:

Referring to independent claims 1, 8 and 14 and dependent claims 3-7, 10-13 and 16-19, cited prior art does not teach an image processing apparatus, method and computer-readable medium comprising:

optically obtaining a plurality of first images by photographing an object to be rendered from a plurality of different directions, and optically obtaining second images that pertain to distance information of the object to be rendered;

generating a geometrical shape model of the object to be rendered on the basis of the second images using a plurality of voxels;

generating a plurality of microfacets as two dimensional elements that are each centered inside a voxel in a manner to approximate a three-dimensional shape of the geometrical shape model, wherein the width of each microfacet is calculated as equal to, or greater than, the square root of three times the width of each corresponding voxel;

executing a billboarding process that rotates the plurality of microfacets to keep the plurality of microfacets substantially vertical to a view direction; and

generating a third image by selecting texture images for respective microfacets from the plurality of first images on the basis of the plurality of photographing directions and the view direction, and by projecting the selected texture images onto the microfacets.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2628

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kee Tung can be reached on (571) 272-7794. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
